

HOW TO USE THIS WIKI

This wiki creates a compassionate, comprehensive, and culturally grounded library that respects the complexity of survivors' journeys while empowering communities to create lasting change. It is designed to grow organically through collaborative contributions, remaining responsive to the evolving needs of survivors and their allies in Kerala and beyond. The architecture moves from validation and grounding (Sections I-II), through practical tools for safety and healing (Section III), to community support and collective action (Sections IV-V), while addressing specific contexts and ongoing learning (Sections VI-VIII). This progression honors both individual healing and structural transformation, recognizing that personal and political liberation are deeply intertwined.
